

Windscreen Cut-Out/Removal System

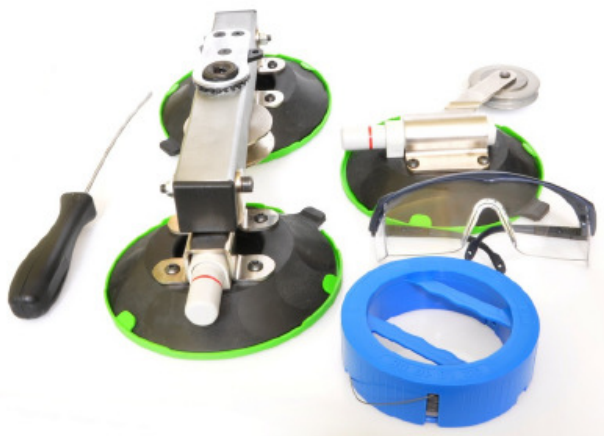

Cut-IT is the new technology about cutting out windows of vehicles. Based on wire technology the system works easily with one person only. Windows are getting more and more complicated in shape and the gap between window and body frame are getting smaller down to 2mm. The Cut-IT windshield removal system is designed that no interiors have to be removed. With correct application, it is almost impossible to damage the window or the body frame where the window is glued to. Windows with vulcanised rubber sealing can be removed without any damage.

The NEW CUT-IT EVO 1

The New and Improved version based on customers' feedback, with

- Double suction pad
- Bigger spool diameter
- Convenient ratchet system
- Higher torque

*This product is approved by
- Peugeot
- Citroen
- Renault*

CUT-IT cutting wire square 0.6mm

N° PM0218

- 50m cutting wire on a plastic bobbin. Square shaped for a better cutting performance and less friction.
- High tensile strength.
